

PDi Virtual Warehousing

Finger-tip control - global reach

Manage your resources remotely using PDi's virtual warehousing and benefit from maximising efficiency - cost reductions - space saving - global reach - real-time reports.

Whether you are in a sales/marketing meeting deciding what collateral to deploy and where to target a specific campaign or in a shareholders meeting and you need to send time-critical information to a select audience, using 'virtual warehousing' enables you to execute decisions instantly.

View stock online and target recipients using PDi's 'Virtual warehouse' service. Simply select what you want to send and apply instructions on the database, and leave the rest to PDi.

Virtual warehousing provides project stakeholders with line-of-

sight from stock control to delivery. The virtual service removes guesswork from a critical process. No special training required; you have a dashboard at your fingertips that affords real-time access to essential planning and progress reports.

Virtual warehousing provides actionable information so you can assess results and modify campaigns.

PDi Smart Distribution

PDi Rapid Document Creation

PDi Corporate Services

Documents are securely stored and clients have password-protected on-line access to inventory, ordering and call off system. View and manage documents and up-to-date stock levels.

Immediate release of promotional marketing material or corporate collateral is available through PDi's online ordering.

Online POD service

PDi's online Track and Trace portal allows clients to track consignments through to final delivery with complete Proof of Delivery information provided.

PDi clients can access a booking facility from their local PC to view the quantity of goods available and manage their own stock and distribution requirements.

Whether high or low volume, short or long term, regular or infrequent, PDi tailor storage and distribution services to meet each client's requirements.
