

PDi Distribution Consultancy

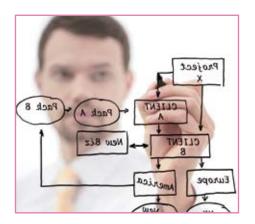

Effective distribution is impossible without proper planning

Review your distribution process to ensure that your business meets today's demands PDi's Logistics and Systems Consultancy Services take an in-depth look at what impact distribution has on your business. We will work with you to evaluate where your distribution process is now, where you want it to go, and how you're going to get there.

PDi Consultancy works with you to identify specific distribution objectives and develop innovative strategic plans to ensure that you achieve them. A full audit covers aspects such as

costs, data management, scalability and stakeholder access, warehousing, remote management tools, training and orientation.

Distribution is often the last link in an organisation's customer relationships and very often the forgotten one. At PDi we understand the value and importance of guaranteed on-time delivery, on budget.

Distribution Services 'Audit'

- PDi will carry out a full assessment of your distribution business requirements and objectives.

Cost Evaluation

- Distribution budget planning.
- Assess the business requirement (Return On Investment ROI) for targeted and on-time delivery.
- Assess the business requirement (ROI) for general distribution.
- Assess the business requirement (ROI) for tracking and management reports.

Service levels

- Evaluate current SLA's (propose content and targets).

Effective transport routings

- Assess consignment priorities, routes by business priority and cost effectiveness.

Assess VFM

- Value-for-money assessment comprises a proprietary mix of measurements across hard and soft cost-benfits.

- Surveys and feedback mechanisms allow clients to benchmark performance and enable them to lead, rather than follow the market.

- Objective feedback is critical to product development, retention and referral.

PDi Report

- PDi provide actionable information on distribution and stock control levels.
